PROFESSIONAL PROFILE

Senior Web Developer with over nine years of experience in full-stack enterprise web application development, delivering scalable features that meet customer needs and drive platform improvements. Experienced in agile leadership, cross-functional collaboration, and mentoring, with a strong record of transforming complex requirements into high-impact, user-centered solutions. Passionate about fostering an open and collaborative company culture.

EXPERIENCE

Shipwire, Inc. - Santa Clara, CA

Senior Software Engineer

FEB 2021 - MAY 2024

- **Strengthened Data Flow**: Developed and optimized RESTful APIs, ensuring faster, consistent data access and reducing internal response times, contributing to faster load times for pages with critical information affecting customers' analytics.
- **Drove Cross-Functional Development**: Collaborated with Product Managers and QA to iterate on features based on customer feedback, leading to higher adoption of self-service tools.
- **Championed Team Growth**: Facilitated team knowledge-sharing and mentorship, boosting productivity by reducing new hire onboarding time and promoting team cohesion.

Software Engineer

AUG 2015 - JAN 2021

- **Delivered High-Impact UI Features**: Partnered with Product and Design to develop new interactive components and visualizations that improved the usability of order and inventory tracking.
- **Led Feature Development**: Coordinated across Engineering, Product, and Design teams to deliver user-driven features, including new pages, components and usable widgets, that strengthened key customer retention and informed data-driven sales strategies.
- **Improved User Engagement**: Modernized legacy dashboard and order-management pages, and introduced real-time data components, simplifying operational workflows for enterprise customers.

Complete Solar - Foster City, CA

Frontend Engineer

JUL 2014 - JUN 2015

- **Elevated User Interface Usability**: Developed dynamic user interfaces, aligning with modern web standards to enhance usability and improve customer satisfaction.
- **Transitioned Version Control**: Led the migration from a legacy version control system to GitHub, enhancing code collaboration efficiency, reducing code conflicts, and streamlining the CI/CD pipeline.

EDUCATION

General Assembly - San Francisco, CA

Web Development Immersive (Bootcamp)

MAR 2013

San Francisco State University - San Francisco, CA

Bachelor of Science - Business Administration

MAY 2010
